Executive Summary

B.E. Electronics and Communication Engineering graduate (2026) with hands-on full-stack development experience building web applications end to end with Python, Django and MySQL. Experienced in REST API integration, debugging backend and frontend issues, and collaborating in Agile teams, with working knowledge of Firebase and cloud services. Seeking a Full Stack Developer role to build clean, modular and reliable applications.

Technical Skills

- **Backend:** Python, Django, Flask, Django ORM, REST API integration
- **Frontend:** React.js, JavaScript, Tailwind CSS, Vite
- **Database:** MySQL, custom SQL queries, relational databases
- **Cloud and Tools:** Firebase, AWS (familiar), Git, GitHub, VS Code
- **Fundamentals:** OOP, data structures, Linux (basics)

Internship Experience

Full Stack Python Development Intern, FIIT Jun 2025 – Jul 2025

- Designed and built an Instagram Clone end to end using Python, Django, MySQL and JavaScript, implementing 7 views and 4 core features: authentication, image uploads, likes and profile management.
- Built the backend with Django ORM and custom SQL queries; resolved an image upload bug traced to a media path misconfiguration between the Django backend and the frontend request format.
- Refactored API logic using Agile iteration and mentor feedback to improve modularity, error handling and reliability.
- Used Git-based version control and collaborative workflows for structured code management.

Engineering Projects

AgencyFlow – Multi-Business Website Management Platform
React.js, Tailwind CSS, JavaScript, Vite, AOS, Lucide React, GitHub

- Developed a responsive multi-business website management platform with a modern UI/UX and mobile-responsive design using React and Tailwind CSS.
- Implemented interactive sections, scroll animations with AOS, Lucide React icons and a dark mode; managed the project with Vite and GitHub.

NEER VAZHI – IoT Predictive Drainage Intelligence
Python, Arduino, Firebase, Weather API

- Built and presented at the TNWISE Women's Hackathon as part of a 3-member team; integrated a live Weather API, Firebase cloud storage and a real-time dashboard with GPS-tagged drain monitoring.
- Designed the software integration between hardware sensors and the cloud backend, with automated authority alerts on threshold breach to replace manual on-site monitoring.

Education

B.E. Electronics and Communication Engineering, Arunai Engineering College 2022 – 2026
CGPA: 7.97

HSC, The Path Global Public School 2020 – 2021
72.40%

SSLC, The Path Global Public School 2018 – 2019
64.80%

Certifications

- Full Stack Development – NoviTech R&D
- Python – Cognifyz

Soft Skills

Problem-solving • Quick learning • Agile collaboration • Clear communication • Clean, modular coding

Languages

English (Professional) | Tamil (Native)
